Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements

This document defines the functional and non-functional requirements for the AI Powered Debt Relief & Financial Recovery Platform. Functional requirements describe what the system should do, while non-functional requirements specify quality, performance, security and usability expectations.

Step 1 : Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority
1	User Management	Allow users to register, login securely and manage their profile and financial information.	High
2	Loan Management	Enable users to add, view and manage multiple loans including lender details, outstanding balance, EMI and due dates.	High
3	Financial Profile	Capture user income, expenses and calculate debt-to-income ratio and repayment capacity.	High
4	AI Recommendation	Use AI (Gemini) to analyze financial data and suggest optimal debt relief and settlement options.	High
5	Negotiation Letter Generator	Auto-generate personalized negotiation letters based on AI recommendations.	High
6	Settlement Tracking	Track settlement status, update communication and store final settlement details.	High
7	Dashboard & Reports	Provide dashboards and downloadable reports on loans, settlements, savings and progress.	Medium
8	Notifications & Alerts	Send reminders for EMIs, due dates, and important actions via notifications.	Medium

Step 2 : Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
1	Performance & Speed	System should process user requests quickly, including AI analysis and report generation.	Typical response time < 3 seconds (95% requests).
2	Scalability	System should support growth in users, loans and data without performance degradation.	Support 1000+ concurrent users and 10,000+ loan records.
3	Security	Protect user data, financial information and documents with strong security measures.	Data encrypted at rest and in transit. Role-based access control.
4	Reliability & Availability	System should be available and reliable for users at all times.	Uptime ≥ 99.5%.
5	Usability	Platform should be easy to use with intuitive UI/UX.	User satisfaction score ≥ 4 out of 5.
6	Data Quality	Ensure accuracy and consistency of financial data and AI recommendations.	Data validation rules and AI accuracy ≥ 85%.
7	Compliance & Privacy	Comply with data privacy laws and financial regulations.	Adhere to applicable data protection and financial compliance standards.
8	Maintainability	System should be easy to maintain and update.	Modular code, documentation and test coverage ≥ 80%.
