

Project Initialization and Planning Phase

Date	10 July 2026
Team ID	
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) Report

The proposed solution is an AI Powered Debt Relief & Financial Recovery Platform that helps users manage their loans, analyze financial health, get settlement recommendations and generate AI-driven negotiation strategies and letters to resolve debts effectively.

Project Overview

Topic	Description
Objective	Build an intelligent platform that helps users reduce their debt burden through AI-powered analysis, personalized settlement recommendations and negotiation support.
Scope	Loan management, financial health analysis, settlement recommendation, AI negotiation letter generation, dashboard and reporting.
Out of Scope	Bank / NBFC payment processing, legal advisory services, credit score modification.

Problem Statement

Many individuals struggle with high-interest loans and lack the right strategy to negotiate settlements. Traditional debt relief services are expensive and not personalized. There is a need for an AI-powered platform that provides data-driven insights, negotiation strategies and structured settlement plans to help users resolve their debts efficiently.

Proposed Solution

Topic	Details
Approach	Use AI and financial analytics to analyze loan data, recommend optimal settlements, and generate negotiation letters tailored to lenders.
Key Features	• Add and manage multiple loans • Financial health score and debt analysis • AI-powered settlement recommendation • Intelligent negotiation letter generation • Dashboard with savings and progress tracking • Exportable reports and settlement plans

Resource Requirements

Resource Type	Description	Specification / Allocation
Hardware		
Processor	CPU	Intel Core i5 / Ryzen 5 or higher
Memory	RAM	8 GB or above
Storage	Disk Space	10 GB free SSD space
Software		
Programming Language	Python	Python 3.10+
Backend Framework	FastAPI	Latest Stable Version
Frontend Framework	React.js	Latest Stable Version
Database	SQLite (Development)	Can be migrated to PostgreSQL (Production)
ORM	SQLAlchemy	Latest Stable Version
AI / NLP API	Google Gemini API	Gemini 1.5 Flash / Pro
Other Libraries	Pydantic, Passlib, JWT, Requests	Latest Stable Versions
Deployment	-	Uvicorn, Vercel / Render / AWS (Future)

Expected Outcome

A smart platform that reduces debt burden by providing personalized settlement plans and AI-generated negotiation strategies, helping users save money and achieve financial freedom.

Tech Stack

Python, FastAPI, React.js, SQLite, SQLAlchemy, Google Gemini API, JWT, Pydantic, Uvicorn

Note

All modules must follow modular coding, proper naming conventions, code comments and PEP-8 guidelines.
