

Coding & Solution – AI Debt Relief

Date	10 July 2026
Team ID	XXXXXXX
Project Name	AI Debt Relief Platform
Maximum Marks	5 Marks

Coding & Solution

This document evaluates the quality and completeness of the implemented solution for the AI Debt Relief Platform. The project demonstrates working functionality, clean coding practices, modular design, and alignment with the defined requirements.

Instructions

1. Ensure the code is well-structured and documented.
2. Implement all core functional requirements.
3. Include source code, configuration files and setup instructions.
4. Provide the GitHub repository link.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/24102A010735/AI-Debt-Relief-Platform

Field	Details
Programming Language(s)	Python, HTML, CSS, JavaScript
Framework(s) Used	Streamlit, FastAPI
Key Features Implemented	Debt Analysis, Payment Affordability AI, Negotiation Assistant, Settlement Management, Dashboard, Report Generation
Pending / Incomplete Features	None
Setup / Run Instructions	1. Install requirements: <code>pip install -r requirements.txt</code> 2. Run the application: <code>streamlit run app.py</code>

Additional Details

Field	Details
Project Description	AI-powered platform that analyzes user debts, suggests personalized relief strategies, negotiates with creditors, and helps users achieve debt freedom faster.
Modules	User Management, Debt Analysis, AI Recommendation Engine, Negotiation Engine, Settlement & Payment Tracking, Reporting
Database	PostgreSQL
Version Control	Git & GitHub
Deployment	Streamlit Cloud / Render
Documentation	README.md included with setup and usage instructions
