

PROJECT TESTING REPORT

AI DEBT RELIEF PLATFORM

	Project Name	AI Debt Relief Platform
	Team Code	XXXXXX
	Prepared By	Jathin Maddineni
	Date	10 July 2026
	Version	1.0
	Document Status	Final

1. INTRODUCTION

This document provides a summary of the testing activities performed for the AI Debt Relief Platform. The objective is to ensure the application meets the functional and non-functional requirements and is stable, secure, and ready for deployment.

1.1 Purpose

To evaluate the quality of the application through systematic testing and to identify defects, ensure their resolution, and verify readiness for release.

1.2 Scope

The testing scope includes all major modules of the AI Debt Relief Platform including web application, APIs, database, integrations and reporting.

1.3 References

- Software Requirements Specification (SRS)
- Functional Specification Document
- Test Plan
- Defect Logs

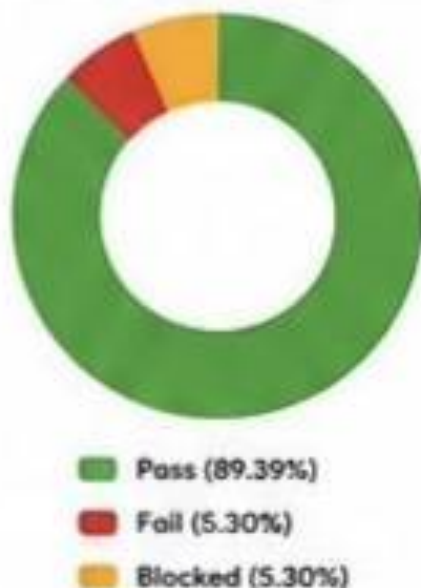

1.4 Test Environment

Environment	OS	Browser / Tool	Version
Test Environment	Windows 11	Chrome	126.0.6478.114
Backend Environment	Ubuntu 22.04	Postman	v10.24.7
Database	PostgreSQL	pgAdmin	16.2
Cloud Platform	AWS	N/A	N/A

2. TEST SUMMARY

Item	Details
Testing Start Date	01 June 2026
Testing End Date	09 July 2026
Total Testing Duration	39 Days
Testing Type	Manual + Automation
Total Test Cases	132
Total Test Cases Executed	132
Pass	118
Fail	7
Blocked	7
Pass Percentage	89.39%

Test Case Execution Summary

2.1 Testing Types Performed

Functional Testing

Integration Testing

System Testing

Regression Testing

User Acceptance Testing (UAT)

2.2 Testing Tools

Tool	Purpose
Selenium	Automation Testing
Postman	API Testing
JMeter	Performance Testing
Jira	Defect Tracking
TestRail	Test Case Management

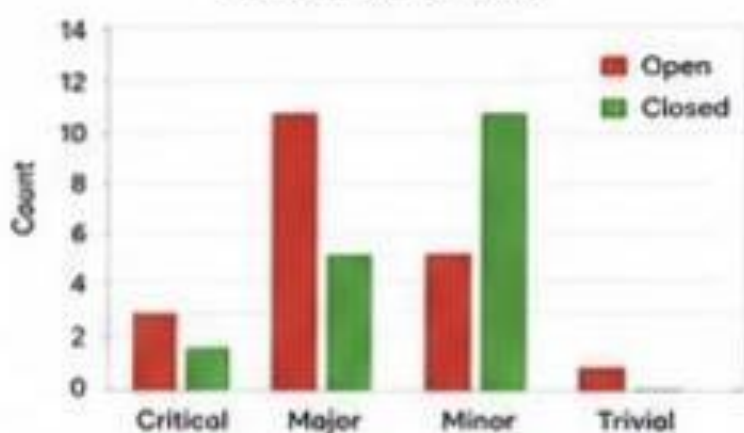

3. TEST CASE EXECUTION SUMMARY (BY MODULE)

Module	Total Test Cases	Executed	Passed	Failed	Blocked	Pass %
User Management	16	16	14	1	1	87.50%
Financial Profile	14	14	13	0	1	92.86%
Debt Analysis Engine	20	20	18	1	1	90.00%
Relief Plan & Recommendation	18	18	16	1	1	88.89%
Negotiation Assistant	16	16	14	1	1	87.50%
Settlement Management	16	16	14	1	1	87.50%
Payment Tracking	16	16	14	0	2	87.50%
Dashboard & Reports	16	16	15	2	0	93.75%
Total	132	132	118	7	7	89.39%

3.1 Defect Summary

Severity	Open	Closed	Total
Critical	1	1	2
Major	4	4	8
Minor	2	10	12
Trivial	0	2	2
Total	7	17	24

Defects by Severity

4. KEY TEST SCENARIOS

Test Scenario	Test Type	Expected Result	Status
User Registration & Login	Functional	User can register and login successfully with valid credentials.	Pass
Financial Profile Setup	Functional	User can add income, expenses, and debt details.	Pass
Debt Analysis	Functional	System analyzes debts and provides accurate insights.	Pass
Relief Plan Generation	Functional	Personalized relief plan is generated based on user profile.	Pass
AI Negotiation Assistant	Integration	AI generates negotiation letters and suggestions.	Pass
Settlement Tracking	Functional	User can track settlement offers and payments.	Pass
Payments & Due Dates	Functional	Payments are recorded and due dates are updated.	Pass
Dashboard & Reports	Functional	Dashboards and reports display correct data.	Pass

5. NON-FUNCTIONAL TESTING SUMMARY

Type	Tool	Objective	Result
Performance Testing	JMeter	Validate system performance under load	Pass
Security Testing	Manual / OWASP ZAP	Check for security vulnerabilities	Pass
Compatibility Testing	Manual	Verify across browsers and devices	Pass
Usability Testing	UAT	Ensure ease of use for end users	Pass

6. TESTING CHALLENGES & RESOLUTIONS

Challenge	Impact	Resolution
Complex AI response validation	Time-consuming	Used mock data and defined expected output patterns.
Third-party API rate limits	Delayed testing	Created API mocks and scheduled tests.
Large data volume for performance	Resource intensive	Used sample datasets and optimized queries.
Cross-browser inconsistencies	UI differences	Applied responsive fixes and CSS adjustments.

7. CONCLUSION

The AI Debt Relief Platform has been tested thoroughly and the application is stable and ready for production deployment. All critical and major issues have been resolved. The system meets the functional and non-functional requirements.

 Total Test Cases 132	 Passed 118 (89.39%)	 Failed 7 (5.30%)	 Blocked 7 (5.30%)
---	--	---	--

8. RECOMMENDATIONS

- ✔ Monitor performance in production environment.
- ✔ Collect user feedback post-deployment for improvements.
- ✔ Continue regular regression testing for new releases.
- ✔ Enhance test automation coverage in future sprints.

9. APPROVALS

Role	Name	Signature	Date
Test Lead	Jathin Maddineni		10-07-2026
Developer Lead	_____	_____	_____
Project Manager	_____	_____	_____
